REVENUE VS OPERATING COST BY AIRLINE

KEY BUSINESS INSIGHTS -

- FINANCIAL**
GlobalWings ranks highest in profitability among the airlines, although overall airline profitability remains negative, indicating a need for stronger cost management.
- OPERATIONAL**
Operational issues are the leading reported delay reason, making operational efficiency a key opportunity for reducing flight disruptions.
- REVENUE & COST**
Airlines with higher operating costs do not necessarily generate proportionally higher revenue, highlighting the importance of balancing revenue growth with cost efficiency.
